

# SHUR-LINE® ROLLER COVERS

The high quality of our roller cover program reflects the pride we take in making painting products that perform on the store shelf as well as on the wall. We ensure the selection and packaging simplifies the shopping experience and the cover delivers on the promises made at the store.

## FABRIC

The roller cover is all about the fabric. Fabrics are tailored to meet the project and surface needs as well as offer multiple price points.

### KNITS

By far the most common roller cover fabric but also the most diverse. Premium knits like our No Lint Knit and Paint+Primer Knit offer consumers a quality step up while still maximizing the paint pick up and release inherent to knit roller covers. The density of the knit fabric can also be manipulated to offer lower cost or economy options.

### WOVEN

The go to fabric for a great finish on a smooth surface. The woven nature of the fabric nearly eliminates shedding making it ideal for projects using gloss or semi-gloss paints.

### MICROFIBER

Offers a great compromise of finish, paint pick up and release.

### WOOL BLEND

This synthetic and natural fiber blend maximizes capacity and delivers a smooth finish.

## NAP LENGTH

Roller cover fabric is trimmed to a certain fiber height or nap based on the surface they are intended to paint.

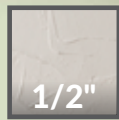

1/4"

Doors & Cabinets

3/8"

Walls & Ceilings

1/2"

Textured Walls & Ceilings

3/4"

Decks & Fences

1"

Stucco, Decks & Concrete

1-1/4"

Brick & Block

## FINISHING

Before the roller cover is ready for sale, Shur-Line's proprietary finishing process "cleans up" the cover to remove loose fibers and fine tune the cover for greater control and coverage.

## PROJECT FOCUS

Quickly select the right roller cover for your project

## QUALITY LEVEL

Simple terminology color coded and highlighted emphasizing why you should select that level

## PAINT & SURFACE CHECKLIST

Each cover includes a handy checklist for picking the tool that best matches your paint finish and surface.

## SHUR-LINE BRANDED ROLLER COVER PROGRAM MATRIX

QUALITY	LEVEL	FABRIC TYPE BY NAP						FABRIC COLOR		
		NO LINT KNIT	PAINT + PRIMER KNIT		KNIT	WOVEN			MICROFIBER	WOOL BLEND
Premium*	Professional Quality & Finish	3/8"				1/4"	3/8"		3/8"	White
Best*	Best Results Superior Finish		1/4"	3/8"	1/2"			3/8"	7/16"	White
Better	Better Coverage Holds More Paint				1/4"	3/8"	1/2"			Beige
					3/4"	1"	1-3/4"			
Good	Good Value				1/4"	3/8"	1/2"			Pink
					3/4"	1"	1-3/4"			

\*The Premium and Best levels mix fabrics for optimal performance on a given surface.
